7:45 – 8:15	FAQ from across DOE Complex – How can the H&S requirements be satisfied?	EH-52
8:15 – 9:00	Open Q's and A's	EH-52

10 CFR 851 “Worker Safety and Health Programs” was published on February 9, 2006 and must be fully implemented by February 26, 2007. The methods for implementing the Health and Safety requirements of 10 CFR 851 Subpart C must be documented in a written Worker Safety and Health Program and approved by the DOE head of the field element.

This year’s Workshop will focus on assisting DOE and DOE contractor industrial hygienists in understanding what should be included in the Written Safety and Health Program and includes an interactive discussion of the DRAFT 10 CFR 851 Implementation Guide. The Implementation Guide will cover all aspects of the new worker safety and health rule. An interactive discussion will allow the Office of Worker Protection Policy and Programs to obtain input in the form of best practices and lessons learned from field safety and health professionals in order to assure that the guide provides appropriate guidance.
